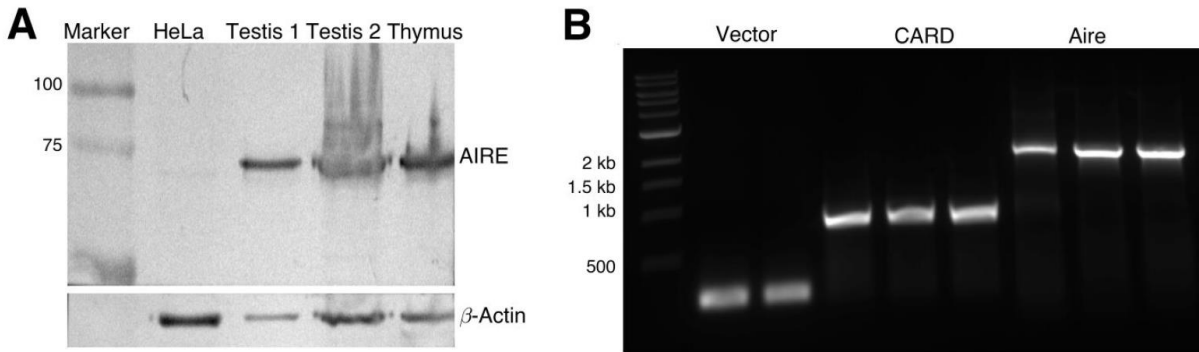

Figure S1. (A) Lysates of HeLa cells (HeLa), mouse testis (Testis 1 and Testis 2) and mouse thymus (Thymus) probed with anti AIRE antibody to confirm the specificity of anti-AIRE antibody. Beta actin served as loading control **(B)** RT-PCR evaluation of GFP (vector), *CARD*-GFP (CARD) and *AIRE*-GFP (AIRE) transcripts in GC1-spg cells transfected with respective plasmids.
