

Erratum

In the original article by Guo, et al., entitled “VDR Activation Reduces Proteinuria and High-Glucose-Induced Injury of Kidneys and Podocytes by Regulating Wnt Signaling Pathway” [Cell Physiol Biochem 2017;43(1):39-51, DOI: 10.1159/000480315], there has been a mistake in Fig. 8, because one picture of the immunofluorescence analysis has been duplicated and therefore misplaced. The correct Fig. 8 is displayed below.

The authors confirm that all of the results and conclusions of the article remain unchanged, as well as the figure legend.

The authors sincerely apologize for this mistake.

Fig. 8. Immunofluorescence analysis for the expression of VDR in kidney tissues from mice at different ages and with different treatment.
