

Retraction Statement

The authors of the article

Piao JM, Wu W, Yang ZX, Li YZ, Luo Q, Yu JL, entitled
"MicroRNA-381 Favors Repair of Nerve Injury Through Regulation of the SDF-1/CXCR4
Signaling Pathway via LRRC4 in Acute Cerebral Ischemia after Cerebral Lymphatic Blockage"
[Cell Physiol Biochem 2018;46(3):890-906, DOI:10.1159/000488821]

have requested retraction on the following basis:

They found that they uploaded two wrong pictures, the staining experiment Fig. 3 and flow cytometry apoptosis experiment Fig. 5. After finding this problem, they attached great importance to it and immediately repeated the experiment, and found that some results of repeated experiments (mainly cell experiment results: flow cytometry results) could not be verified. The article is completely consistent, so they decide to retract the manuscript to avoid misleading other researchers. At the same time, they will continue to research and improve it.
