

Erratum

In the original article by Xu, et al., entitled “Protective Effects of Total Extracts of *Averrhoa carambola* L. (Oxalidaceae) Roots on Streptozotocin-Induced Diabetic Mice” [Cell Physiol Biochem 2014;33(5):1272-1282, DOI: 10.1159/000358695], due to a careless mistake while preparing the manuscript, Fig. 11 contains misplaced images (VI and VII in the Bax group).

The corrected Fig. 11 is displayed below.

The authors confirm that all of the results and conclusions of the article remain unchanged, as well as the figure legend.

The authors sincerely apologize for this mistake.

**Fig. 11.** Effect of EACR on the expression of Bax and Bcl-2 in mouse pancreas tissue. (Immunohistochemical analysis, scale bar: 200  $\mu$ m). I: Normal control; II: Model control; III: 320 mg/kg of metformin; IV: 150 mg/kg of EACR; V: 300 mg/kg of EACR; VI: 600 mg/kg of EACR; VII: 1200 mg/kg of EACR. Note: Arrows represent islet included immunity-positive pancreatic  $\beta$  cells (brown).
