

Erratum

In the article ‘Hybrid Complexes of High and Low Molecular Weight Hyaluronans Highly Enhance HASCs Differentiation: Implication for Facial Bioremodelling’ [Cell Physiol Biochem 2017;44:1078-1092. DOI: 10.1159/000485414] by Stellavato et al., in Figure 2, the authors mistakenly used the same picture for LHA, 7 and 14 days as well as HHA, 7 and 14 days and HHA 21 days and Medium cross linked HA 7 days. The error was introduced inadvertently when compiling the multi-panel figure. The authors have checked the original data and confirm the accuracy of the findings.

The corrected Figure 2 is shown here.

**Fig. 2.** Oil Red O analyses showing no adipogenic differentiation is occurred for ASCs cultured in standard medium supplemented with substances.
