# Retraction Statement

The article

“Roles of the Exogenous H2S-Mediated SR-A Signaling Pathway in Renal Ischemia/Reperfusion Injury in Regulating Endoplasmic Reticulum Stress-Induced Autophagy in a Rat Model”  
[Cell Physiol Biochem 2017;41:2461–2474. DOI: 10.1159/000475915]  
by Qing Ling, Xiao Yu, Tao Wang, Shao-Gang Wang, Zhang-Qun Ye and Ji-Hong Liu

has been retracted by the current and former Publishers and the Editor.

After the publication of this article, concerns were raised about the integrity of some of the data presented. Specifically, image duplication was observation between Figure 5 and Figure 6 in this article.

The authors did not respond to requests to comment on the concerns and provide the raw data within the given timeframe despite multiple attempts of contact. The matter has been raised to the corresponding author’s institution who did not respond to our request for an investigation. Given the severity of the concerns raised this article is being retracted.

The authors have not responded to our correspondence regarding this retraction despite multiple attempts of contact.
