Erratum

In the article "Microbial Intervention as a Novel Target in Treatment of Non-Alcoholic Fatty Liver Disease Progression" [Cell Physiol Biochem 2018;51:2123-2135. DOI: 10.1159/000495830] by Zhou et al, the incorrect representative images in Figure 3 were included in the article due to a miscommunication between the pathology center that processed the tissue samples and the authors. The error was recently discovered and the authors, with the pathology center, have verified the correct images for the experiment. The authors subsequently submitted this erratum.

The corrected Figure 3 is shown here.

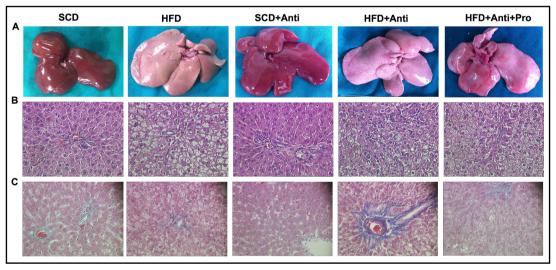

Fig. 3. Histology of controls and NAFLD models including: (A) Representative liver morphology, (B) hematoxylin and eosin, and (C) Masson stained liver sections.
