Erratum

In the article “Hybrid Complexes of High and Low Molecular Weight Hyaluronans Highly Enhance HASCs Differentiation: Implication for Facial Bioremodelling” [Cell Physiol Biochem 2017;44:1078-1092. DOI: 10.1159/000485414] by Stellavato et al., in Figure 7, the image for L-HA treated cells at 7 days was accidentally included for 14 days. This error was introduced during revision of the manuscript in peer review.

The corrected Figure 7 is shown here.

**Fig. 7.** Analyses of adiponectin expression by immunofluorescence showing HCCs induce a strong expression of adiponectin compared to other substances. Scale bar = 400um.
