

Supplementary Material

The ACE Inhibitor Lisinopril Stimulates Melanoma Cell Invasiveness by Inducing MMP2 Secretion

Yannic Becker Christian Stock

Department of Gastroenterology, Hepatology & Endocrinology, Hannover Medical School, Hannover, Germany

Supplementary Fig. S1. Proliferation of MV3 cells in the presence of RAAS-modulating drugs. Relative proliferation under (A) serum-containing conditions for 48 h ($N = 3$) and (B) serum-depleted conditions for 96 h ($N = 2$), each normalized to the values obtained in the absence of both drugs and ATII. Bars show the mean+SD. Los=losartan, Lis= lisinopril, EMA=EMA401.
