

## Cellular Physiology and Biochemistry

- 333 **Matrix Metalloproteinase 13 from Satellite Cells is Required for Efficient Muscle Growth and Regeneration**  
Smith L. (Philadelphia; Davis), Kok H. (Gainesville), Zhang B. (Philadelphia), Chung D. (Philadelphia), Spradlin R. (Gainesville), Rakoczy K. (Gainesville), Lei H. (Philadelphia; Gainesville), Boesze-Battaglia K. (Philadelphia), Barton E. (Philadelphia; Gainesville)
- 354 **CRISPR/Cas9 Technology in Translational Biomedicine**  
Leonova E. (Saint Petersburg; Sochi), Gainetdinov R. (Saint Petersburg)
- 371 **Mechano-Pharmacological Testing of L-Type Ca<sup>2+</sup> Channel Modulators via Human Vascular Cell Culture Model**  
Bayer R. (Jülich), Artmann A. (Jülich), Digel I. (Jülich), Falkenstein J. (Jülich; Cologne), Artmann G. (Jülich; Cologne), Creutz T. (Jülich), Heschler J. (Cologne)
- 384 **Fat Quality Matters: Distinct Proteomic Signatures Between Lean and Obese Cardiac Visceral Adipose Tissue Underlie its Differential Myocardial Impact**  
Conceição G. (Porto), Matos J. (Aveiro), Miranda-Silva D. (Porto), Gonçalves N. (Porto), Sousa-Mendes C. (Porto), Gonçalves A. (Porto), Ferreira R. (Aveiro), Leite-Moreira A. (Porto; Aveiro), Vitorino R. (Porto; Aveiro), Falcão-Pires I. (Porto)
- 401 **Genistein and 17 $\beta$ -Estradiol Protect Hepatocytes from Fatty Degeneration by Mechanisms Involving Mitochondria, Inflammasome and Kinases Activation**  
Farruggio S. (Novara), Cocomazzi G. (Novara), Marotta P. (Novara), Romito R. (Novara), Surico D. (Novara), Calamita G. (Bari), Bellan M. (Novara), Pirisi M. (Novara), Grossini E. (Novara)
- 417 **Leptin Resistance in the Ovary of Obese Mice is Associated with Profound Changes in the Transcriptome of Cumulus Cells**  
Wolodko K. (Olsztyn), Walewska E. (Olsztyn), Adamowski M. (Olsztyn), Castillo-Fernandez J. (Cambridge), Kelsey G. (Cambridge), Galvão A. (Olsztyn; Cambridge)
- 438 **Calbindin-D<sub>28k</sub> is a Novel Risk Gene for Neurodegenerative Disease**  
Jung E. (Cheongju), Yoo Y. (Cheongju), Park S. (Cheongju), Ahn C. (Cheongju), Jeon B. (Cheongju), Hong E. (Daejeon), Kim W. (Kent), Jeung E. (Cheongju)
- 457 **Molecular Pathways Leading to Induction of Cell Death and Anti-Proliferative Properties by Tacrolimus and mTOR Inhibitors in Liver Cancer Cells**  
Navarro-Villarán E. (Seville; Madrid), de la Cruz-Ojeda P. (Seville), Contreras L. (Seville), González R. (Seville; Madrid), Negrete M. (Seville), Rodríguez-Hernández M. (Seville; Madrid), Marín-Gómez L. (Seville; Madrid), Álamo-Martínez J. (Seville; Madrid), Calvo A. (Puerto Real), Gómez-Bravo M. (Seville; Madrid), de la Cruz J. (Seville), Padillo J. (Seville; Madrid), Muntané J. (Seville; Madrid)
- 474 **Calcium-Mediated Interactions Regulate the Subcellular Localization of Extracellular Signal-Regulated Kinases (ERKs)**  
Chuderland D. (Rehovot), Marmor G. (Rehovot), Shainskaya A. (Rehovot), Seger R. (Rehovot)
- 493 **Status Epilepticus Dynamics Predicts Latency to Spontaneous Seizures in the Kainic Acid Model**  
Costa A. (Modena), Lucchi C. (Modena), Simonini C. (Modena), Rosal Lustosa I. (Modena), Biagini G. (Modena)
